## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Shudder et al. (US Patent No. 5,461,867). Shudder discloses a self heating/self cooling container for producing exothermic or endothermic reaction and comprising: a outer container and inner container, a breakable barrier (34), and inner module body (18) and a container body (10) and furthermore has a flexible membrane.

### ***Allowable Subject Matter***

**Claims 14-21 are allowed over the prior art of record.**

Claims 4-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***
